## Education

---

**Bachelor of Technology in Computer Science** Expected 2028 Graphic Era Hill University Dehradun

## Technical Skills

---

**Programming Languages:** C, C++, Java, Python, JavaScript, SQL

**Web Development:** React, Vite, HTML, CSS, Express.js, Node.js, Flask, REST APIs

**Databases:** MongoDB, SQL

**Tools Technologies:** Git, Docker, Spring Boot

**Core Computer Science:** Data Structures and Algorithms (DSA), Object-Oriented Programming, Database Management Systems, Problem Solving, Competitive Programming

## Projects

---

### Secure Online Voting Platform

- Created a full-stack voting platform using Spring Boot, Flask, and Vite where authenticated users can organize elections and cast votes securely.
- Added user authentication, election management, and vote tracking features to maintain election integrity.
- Integrated an Isolation Forest model to identify unusual request patterns and reduce the impact of potential DDoS attacks.
- Built REST APIs and database workflows for vote storage, result retrieval, and election management.

### PDF Editor and Document Processing Tool

- Created a PDF utility application supporting image-to-PDF conversion and common document editing operations.
- Added functionality for document processing, file uploads, and export workflows.

### Credit Card Fraud Detection System

- Trained machine learning models to identify potentially fraudulent credit card transactions.
- Applied SMOTE to address class imbalance and improve fraud detection performance.
- Performed data preparation, feature selection, and evaluation using standard classification metrics.

## Achievements

---

- **First Runner-Up** in a college-level coding competition for first-year students, competing against more than 1,000 participants.
- Reached the Top 50 teams in **SAARTHI'25**, a national-level hackathon with over 500 participating teams.
- Reached the Top 25 teams in **Watch the Code**, a national-level hackathon with over 300 participating teams.
- Attained **Specialist** status on Codeforces (Max Rating: 1436).
- Attained **3-Star Programmer** status on CodeChef (Max Rating: 1696).
- Solved **1000+** algorithmic problems across Codeforces, CodeChef, LeetCode, and other competitive programming platforms.
- Reached the Top 10 teams in **AlrIEEEEna'26**, a State-level machine learning hackathon with over 100 participating teams.

## Leadership Extracurricular Activities

---

### **IEEE Student Member, Graphic Era Hill University**

- Assisted in organizing inter-college technical and academic events conducted by the IEEE student chapter.
- Coordinated with student volunteers and participants during event planning and execution.
- Supported event logistics, registrations, and on-ground management activities.
